

## IT systems for a new facility

When Reproductive Health Group opened their new facility, providing the highest quality care in gynaecology, fertility and IVF they turned to Hallidays for a solution to their complex IT requirements. Here's how we helped...

### Before

- ✘ There was no easy way of sharing documents or data between multiple offices without a centralised management solution.
- ✘ Reproductive Health Group were reliant on a third-party supplier for data backups which meant they did not have the control or ease of access they wanted.
- ✘ No formal IT support left their team frustrated with daily issues.

### After

- ✔ The new clinic, complete with state-of-the-art IT systems, enables the Reproductive Health Group to provide the very best in reproductive healthcare and advice.
- ✔ Our fully automated online backup system ensures that all data is first encrypted and then copied offsite onto cloud storage. In the event of a site disaster, all data is fully recoverable.
- ✔ Our engineers have developed a great working relationship with their team. IT is no longer stressful as they know they can turn to us whenever an issue arises.

## Outcome

The state-of-the-art systems continue to support the Reproductive Health Group's operations, enabling them to make huge waves in the gynaecology, fertility and IVF fields.

Our dedication to building personal relationships has given every member of the group confidence in their IT. Whether an experienced user or novice, they have peace of mind they can call or email us anytime knowing they will get a solution to their problem.

As part of our promise to our client, we continue to develop their systems to ensure they can work as efficiently and effectively as possible from anywhere in the world.

## What the client said

“*Reproductive Health Group has been through an intense period of growth during this past year. Hallidays have been with us every step of the way and have been instrumental, along with the project team, in getting us up and running. The centre was officially opened in March 2014 and the ongoing support received from the entire team at Hallidays has been fantastic. Thanks so much, we couldn't have done it without you.*”
